

GRAPHIXON

PAT. PEND.

FINISHES

Dear Leather Professional,

Graphixon Finishes is proud and excited to introduce a revolutionary and Patent Pending technology that is poised to bring about a paradigm shift in the leather industry. The industry as a whole, will now be able to offer photographic quality, high resolution, full color graphics enhancement on leather products with ease and without limitation.

The graphics can be chosen at random, or may be proposed or supplied by the customer. Customization offers the discriminating buyer an opportunity to own unique and differentiating products, while offering the professional greater flexibility and profitability. Minor surface blemishes and defects will now become a thing of the past, turning a loss into a source of incremental profits.

There is absolutely no restriction on the type of graphic, fine art or photographic image that can be transferred using the Graphixon Finishes unique technology. The finished process does not change the feel of the material, retaining the original flexibility of the softest leather, faux leather or canvas. As an intrinsic part of the treated paper and laminating process, the transferred image is automatically protected under a durable, abrasion, soil and weather resistant film. The graphic enhanced objects such as handbags, apparel, upholstery, etc. will retain their beauty and wear resistance throughout their useful life.

The investment required to implement this technology is minimal and time to get up and running is as quick as you want it to be. We provide extensive hands-on training and after sales support to help and guide you throughout your association with Graphixon Finishes. The entire process is eco-bio friendly and there are no hazardous materials, fumes or odors associated with the process.

This opportunity is being made available to a select, and pre-qualified group of professionals on a first come, first served basis. Only an optimal number of dealers will be established in given geographical areas. We will implement necessary checks to protect the rights of individual dealers. Consumer inquiries will be re-directed to the appropriate partner dealer. Graphixon Finishes will be marketed and sold as a professional use technology through channels, and channel partners only.

Call us to learn more about this technology and how you can become a part of an exciting innovation that will change the luxury leather, canvas and vinyl products industry. With astounding looks and finishes never before possible, Graphixon Finishes will help make your product and your business unique among your peers.
